

2-Headed XT LENTRY® Systems

LENTRY Generator & Light Systems are available with **Two-Headed XT Lights**. (XT stands for eXtra Tall). This light option includes one telescoping pole and two 650W high-infrared (Hi-IR) halogen heads.

The two lighthoods are very efficient, producing 50,000 lumens total, 25,000 lumens each. (Each 650W light produces more than twice the light of a comparable 500W bulb.)

Each light head moves independently, can rotate 360 degrees, and may be aimed up and down.

The **Two-Headed XT Light** requires a Single Light Base which supports the light and holds it centered in front of the generator. Like all LENTRY telescoping lights, the Two-Headed XT is easily released from the rest of the unit by turning the knob on the Single Light Base.

Because the **Two-Headed XT Polelight** needs 1300 watts of power to run both lights at once, it is only available with the Honda EU2000i generator (rated 1600w continuous). The EU2000i is rated to power the lights simultaneously for more than four hours on a tank of gas.

Far right: James stands next to the first **Two-Headed XT LENTRY Unit**. James is 6 foot 3 inches tall. Units with the new **Two-Headed XT Polelight** will stand about 8.5 feet tall with legs and light fully extended.

Separated from the frame and generator, the **Two-Headed XT Polelight** shortens to approximately 55 inches long. **Two-Headed XT LENTRY Units** stand 5 feet tall even with the light down, as shown below left.

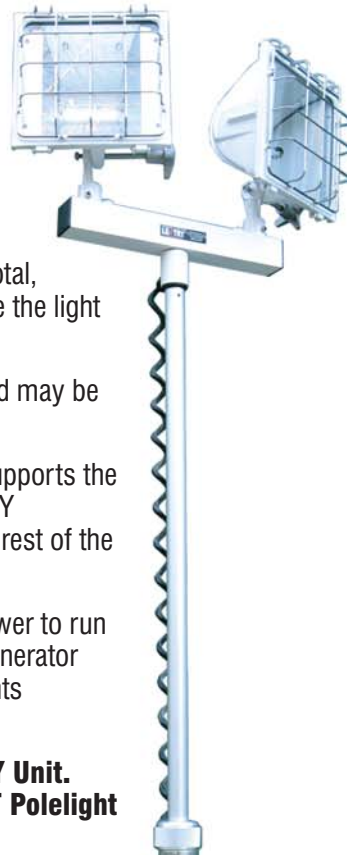

Approx. 5 feet tall as shown, with Light down but legs extended

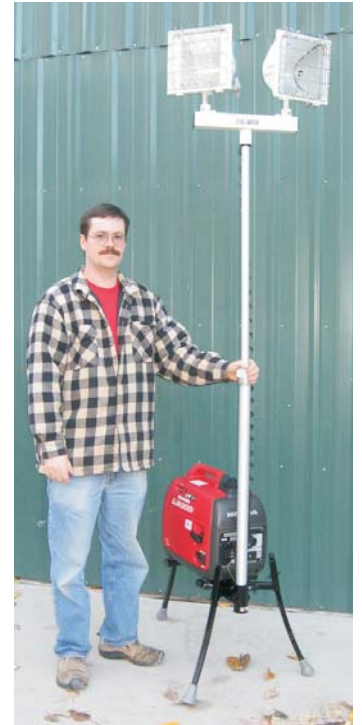

Complete unit includes a Honda EU2000i Generator, LENTRY Legs, a Single Light Base and a Two-Headed XT Light. Please see the Price Sheet for a breakdown of the components (which retrofit to existing Honda EU2000i generators) and other available models.

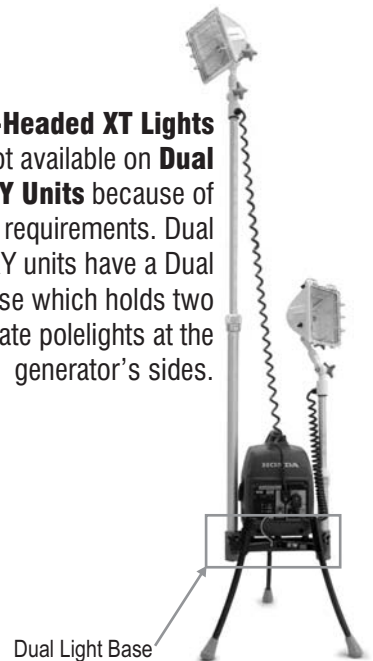

Single Light Base

Over 9 feet tall with Legs and Light fully extended

2-Headed XT Lights are not available on **Dual LENTRY Units** because of wattage requirements. Dual LENTRY units have a Dual Light Base which holds two separate polelights at the generator's sides.

Dual Light Base
