

NEW PRODUCT RELEASE

LENTRY® Systems now available with FRC 650W Polelights

Each light generates 25,000 lumens while only using 650 watts

Produces a uniform beam that lights up an area 100 degrees vertically by 150 degrees horizontally

Uses a uniquely designed, vacuum deposit, polished reflector and two optimizing mirrors to maximize light emission

LENTRY Systems are available with:

- ✓ Either Standard Height or XT polelight (~4.5 or ~8.5 feet tall, fully extended)
- ✓ Honda EU1000i generator with Single Light Base
- ✓ Honda EU2000i generator with Single or Dual Light Base

Specially designed light head has a curved lens and “head down” shape which puts more light on the scene without the need for an increase in power

Please see the Price Sheet for complete pricing on all 28 complete LENTRY Systems as well as the individual components

Shown here with a Single Light Base and Standard Height Polelight
