

Original Body Style

Pic 1

All 20-inch VENTRY Fans originally had this body style

Pic 2

Original body style remains only on model 20E1.5, which comes with Solid Wheels & Folding Tow Handle. Mister optional.

Body Styles on 20" VENTRY Fans

Effective mid-June 2010

20-inch VENTRY fans have historically had the body style shown in *Picture 1*. This original body style includes a solid tube through which the rear leg slides and an upper handle which connects to the guard for strength (*A* in *Picture 1*).

20" gas-powered VENTRY Fan models now have a different body style with a roll bar, just like larger 24-inch VENTRY Fans have had all along. The new 20-inch fan body style is shown in *Pictures 3 and 4*. Gas powered 20-inch fan models 20GX120 and 20GX160 now have the roll bar / roll cage which surrounds the motor and connects to the guard (*B* in *Pictures 3 and 4*).

This change will not affect electric fan model 20E1.5 (non-GFCI electric) which is shown in *Picture 2*. That model will continue to have the original body style and it now includes Solid Wheels & Folding Tow Handle.

Roll Bar on Most 20" Fans

Pic 3

20" VENTRY Fan models 20GX120 and 20GX160 now have a roll bar.

Pic 4

Top view of 20" VENTRY Fans with the roll bar. All 20" VENTRY Fan models fit in 2 x 2 x 2 ft compartments with room to spare. 20GX120 shown here.
